

Materials list:

- Polymer clay (I recommend Premo! brand): your dragon can be any color you wish – so you should bring white, gold, ecru in addition to 2 or three more colors that will be the dragon's color. If you're not sure what color to choose, bring the white, gold and ecru, as well as green (or green pearl) and blue (ultramarine blue, blue pearl or turquoise) and yellow.
- 28 gauge craft wire for attaching beaded embellishments (aprox. 12" total length needed)
- Sculpting tools: wooden modeling tool(s), needle tool, cutting blade. Any other tools you like to use, bring along.
- Wire cutters and pliers (there will be some to share during class)
- Pasta machine: if you have one, bring it! not necessary, but useful for this class.
- Beads for embellishments: any assortment of beads that are made out of glass, metal, ceramic, crystal, stone, pearl. No plastic or resin, or natural materials such as wood. A variety of color, style and size is useful. Pick colors that will go with the colors of clay you've chosen for your dragon. (There will be some available to use in class, and an assorted bead mix will also be available for purchase.)

Materials are not included in class fee.
All materials can be purchased at The Compleat Sculptor.
