

Materials list:

- Polymer clay (I recommend Premo! brand): ecru, yellow, red pearl (or any other red), gold, white, black.
- 28 gauge craft wire for attaching beaded embellishments (approx. 12" total length needed)
- Sculpting tools: wooden modeling tool(s), needle tool, cutting blade. Any other tools you like to use, bring along.
- Wire cutters and pliers (there will be some to share during class)
- Pasta machine: if you have one, bring it! not necessary, but very useful for this class. If pasta machine is unavailable, bring an acrylic roller rod to flatten the clay.
- Mirror: any shape, at least 4 inches tall and no taller than 7 inches is suggested.
- Beads for embellishments: any assortment of beads that are made out of glass, metal, ceramic, crystal, stone, pearl. No plastic or resin, or natural materials such as wood. A variety of color, style and size is useful. Especially useful are any in the yellow, orange, red and gold shades. (There will be some available to use in class, and an assorted bead mix will also be available for purchase.)

Materials are not included in class fee.

All materials can be purchased at The Compleat Sculptor.
