ALUMA BLACK® A14 BRUSH-ON BLACKENER Instructions

ALUMA BLACK® A14 liquid is a room temperature blackening solution for all aluminum surfaces. Applied by brush-on techniques, the solution carries out a chemical reaction with the metal surface and forms non-dimensional black finish that is bonded to the surface. Recommended for blackening of engravings or small numbers of aluminum components. A clear, protective topcoat is normally used as a sealant over the A14 black finish.

INSTRUCTIONS

1. Thoroughly clean and degrease parts to be blackened, using solvent cleaners that do not leave a residue.
2. Remove transparent surface oxide by abrasive blasting for best results.
3. Apply ALUMA BLACK A14 solution liberally with a sponge, brush or pump sprayer. Best results are obtained when the surface can be “lightly flooded” with the solution, accompanied by light rubbing action. A normal blackening reaction takes 10-60 seconds.
4. Rinse parts with clean water and force dry.
5. Excess sootiness may be removed by wiping with a soft cloth.
6. Apply a protective topcoat such as SATIN SHIELD® clear acrylic sealant or CLEARLOK® clear urethane sealant. Or, use a clear lacquer or paste wax.

CAUTION

ALUMA BLACK A14 contains mineral acids. DO NOT TAKE INTERNALLY.
